Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 21, 2008 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 4, and 14-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukuda (US Patent no. 5,787,204).

Regarding claims 1, 4, 16-19 Fukuda discloses an image data filtering apparatus and method for reducing blocking effect and noise when a frame of the image data is composed of data blocks of predetermined size (See Abstract and col. 3, lines 4-17), the method comprising checking whether all coefficients of pixels in a predetermined

Art Unit: 2621

region of the data block is are equal to zero or not (See Fukuda col. 10, lines 54-61), generating filtering information on whether the data block requires filtering depending on whether all coefficients of pixels in the predetermined region of the data block are equal to zero or not (See Fukuda col. 10, lines 65-67, col. 11, lines 1-4), and filtering the data block passed through inverse quantization and inverse transform according to the generated filtering information (See Fukuda col. 11, lines 25-37 and col. 12, lines 62-67 and col. 13, lines 1-8).

As per claims 14-15, Fukuda's predetermined region further includes a predetermined number of pixels (See col. 10, lines 54-61).

4. Claims 2-3, 5-6, and 8-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
